Bursa Pazarı, the leader of the disposables and packaging materials industry, was established in Eminönü – the heart of the historical peninsula – in 1970 upon great efforts and dedication of two entrepreneur brothers.

Since that day, Bursa Pazarı has had 60 years of experience in its journey, and continues its activities in its state-of-the-art facility in Istanbul with an enclosed area of 13,500 m².

Bursa Pazarı contributes to the Turkish economy with more than 200 employees and exportation to over 30 countries on four continents; the company offers around 5000 products, which are produced and imported by the company itself, to consumers in over 25,000 selling points across Turkey.

Bursa Pazarı achieved unparalleled success in its history covering 60 years. Adopting the notion of superior quality and service, the company brought many novelties owing to its R&D investments and technologic infrastructure. Some of these novelties include cling wrap with slide cutter, roll-free parchment paper, nitrile gloves for children and extra-strong black nitrile gloves.

Bursa Pazarı received appreciation from the industry thanks to its broad product range and became one of the leaders of the industry with its quality products with brands such as Dolphin, Roll-up, Burpak, Fresh-up and Dalia, and with its experienced and dynamic team and strong supply chain. The company offers its own brands and private label products in wholesale channel, retail stores chain, hospitals and medical and e-trade channels at home and abroad.

Upon the acquisition in 2016, Bursa Pazarı joined Bunzl Group. Having started to serve for the first time in London in 1854, Bunzl is today active in more than 30 countries on five continents. The company is one of the major enterprises of the world and a multi-national distribution firm with almost 18,000 employees.

The combination of the experience of Bursa Pazarı covering the last 60 years with Bunzl Group's global perspective helps us fulfill our strategy: "Think global, act local".

Aluminium Foil

As the leading manufacturer of aluminium foil for home kitchens and professional catering environments, we pride ourselves on the high quality standards we apply to all our processes. Aluminium foil, resistant to high temperatures, makes cooking a more convenient experience, and with a texture that prevents food from going bad, it offers the perfect solution for storing food. Aluminium foil is your go-to-material if you are looking to store both hot and cold food for long periods of time. With our state-of-the-art facilities, we can manufacture aluminium foil in different width, length and thickness.

| | Minimum | Maximum |
|------------------|-----------|------------|
| Thickness | 10 micron | 20 micron |
| Width | 28 cm | 60 cm |
| Length | 3 meters | 250 meters |

| Paper Core Inner Diameters | | | |
|----------------------------|-------|-------|-------|
| 26 mm | 30 mm | 39 mm | 50 mm |

Aluminium Foil Package Types

In response to varying customer requirements, we design different boxes for aluminium foil in different dimensions or loose without box. We also put aluminium foil inside transparent or specially printed OPP film packaging.

Our dedicated Design Team can apply brand-specific designs on aluminium foil boxes and cartons.

Packing of aluminium foil in a serrated edged box is also an option, allowing the foil to be cut more conveniently during use. With this kind of edge, there is no need to use extra plastic or metal cutters, thanks to the notches on the box itself.

Advantages of Using Aluminium Foil

- Aluminium foil is ideal for storing, preparing and protecting foods.
- Aluminium foil is heat resistant and suitable for cooking, grilling, baking and barbecuing.
- Aluminium foil keeps hot and cooled dishes fresh longer.
- Aluminium foil protects flavour and vitamins and reduces the transfer of smells.

Cling Film

At our Grade AA BRC certified production facility we manufacture cling film (stretch film) for food products. We have the means to produce cling film from PE or PVC according to our customers' requirements.

Main Features of PE and PVC Cling Film

- PVC cling film is chosen for its flexibility and robustness.
- PVC cling film is naturally light yellow in color and can be purple or pink if desired.
- PVC cling film is safe in contact with other foods except oil and oily foods.
- PE cling film is chosen for its low migration level.
- PE cling film is generally used in home kitchens while PVC cling film is mostly preferred in professional catering settings or industry-size kitchens.
- PE cling film can have different flexibility and tensile strengths thanks to the different compounds used in their production.

Cling Film Dimensional Ranges

| PE Cling Films | Minimum | Maximum |
|----------------|----------|-------------|
| Thickness | 8 micron | 15 micron |
| Width | 28 cm | 60 cm |
| Length | 3 meters | 1000 meters |

| PVC Cling Films | Minimum | Maximum |
|-----------------|----------|-------------|
| Thickness | 7 micron | 15 micron |
| Width | 28 cm | 60 cm |
| Length | 3 meters | 1000 meters |

Cling Film Package Types

Our cling film can be packaged according to the marketing needs of our customers. According to customer wishes, we can deliver with box or without box.

Advantages of using Cling Film

- Cling film is perfect for keeping food fresh in the fridge.
- Meats, vegetables and fruits wrapped in cling film will not dry out, remain fresh and tasty without discolouring.
- Thanks to its unique composition, cling film retains the minerals and aromas of the food.
- Cling film is suitable for contact with food.

Baking Paper

(PARCHMENT PAPER)

As the leading and innovative manufacturer of baking paper, we are proud to bring the most innovative and high quality products to all our customers. Our double side siliconized baking paper is suitable for use in all traditional and modern oven types with a heat resistance of up to 220°C.

Whilst we manufacture baking paper in weights ranging from 35 to 41 gsm, the most popular baking paper weights are 38, 39 or 40 gsm.

Household type of baking paper is usually short and has no paper core while baking paper of more than 30 meters are produced with a core. Baking paper with no paper core is more eco-friendly as it takes less paper and energy to produce it.

We Produce Two Types of Baking Paper

- Straight, wrapped baking paper at lengths desired by the customer
- Precut in dimensions of 37cm x 42 cm for standard baking trays. Our precut baking paper comes in packs of 8, 12, 16, 24 or 30 pieces.

Baking Paper Dimensional Ranges

| Thickness | Width | Length |
|-------------|---------------|----------------------------------|
| 35 - 41 GSM | 25 cm - 80 cm | Min 3 meters up to 200 meters |

We can also produce from 35 GSM to 100 GSM baking paper.

Baking Paper Packaging Types

Household type of baking paper is generally packed in boxes. Boxes feature top or side perforations for ease of use. Our boxes feature specific design elements requested by customers.

Advantages of using Baking Paper in Your Kitchen

- Baking paper is very suitable for use in the oven, but it also prevents products from freezing onto the freezer.
- Baking paper keeps worktop and oven clean during food preparation.
- Baking paper makes greasing baking trays unnecessary and can also be used in the microwave.
- Baking paper could be produced from wood fibres which has FCS or PEFC certifications representing that it comes from responsibly managed forests

Roasting Bag

(OVEN BAG)

Roasting bags are convenient products when cooking meat, chicken and vegetables in the oven. We produce roasting bags in different sizes according to the requirements of our customers. The oven bags are produced from PET raw material, resistant to temperatures of up to 200°C. By default, we manufacture bags using 12 micron PET material.

Roasting Bag Packaging Types

Roasting bags are usually placed inside a specially printed envelope and displayed on a desktop stand. We can package them into standard boxes bearing the customer's brand or bulk without box.

Most Popular Sizes

We produce roasting bags in the following sizes:

- 25 x 38 cm
- 36 x 43 cm
- 41 x 44 cm
- 43 x 60 cm
- 48 x 60 cm (turkey size)
- Slow cooker size

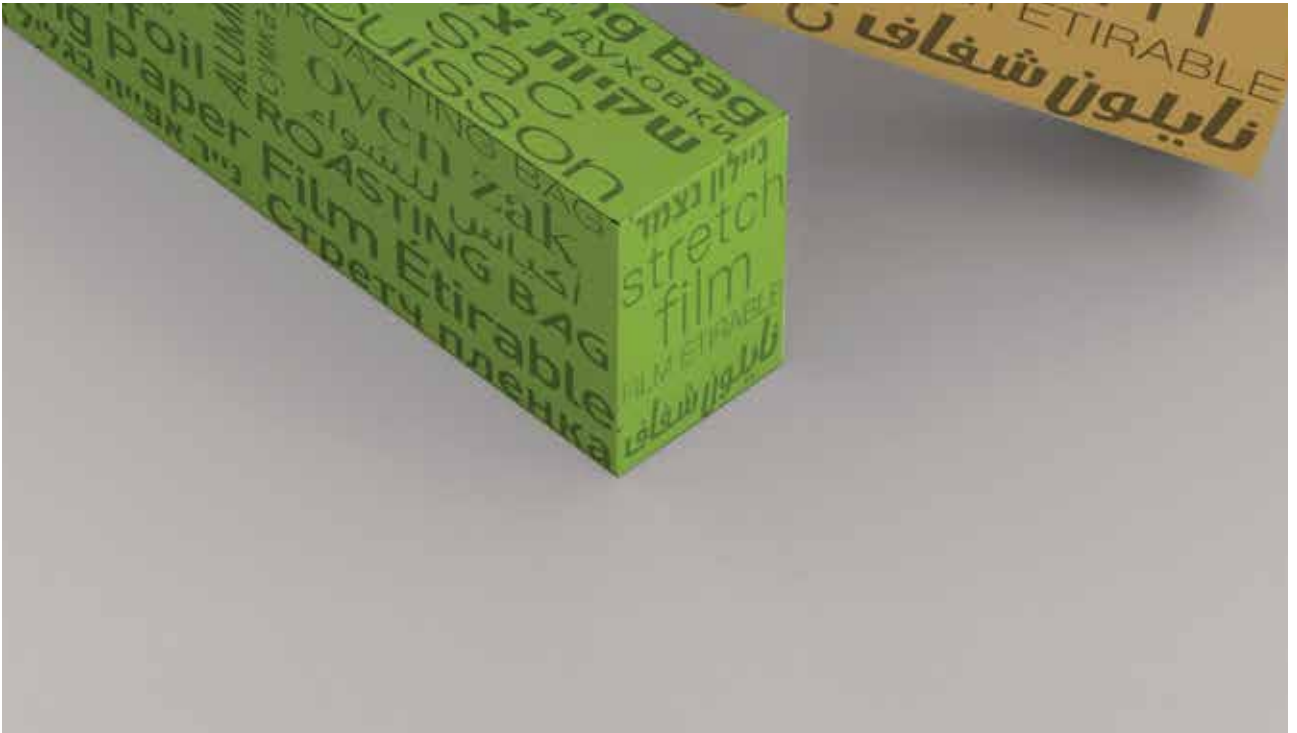

Advantages of Using Roasting Bags

- Food cooks in its own steam resulting in healthy, flavorful dishes.
- The flavor of the chicken and meat is maintained, allowing for juicy meat dishes.
- Food cooks faster and less energy is used.
- Cooking is made hassle-free, with no trays or pots to clean.

Your Brand Our Quality

Private Label Products

Bursa Pazarı has achieved a significant position in the production of private label products. In addition to its important brands of the retail and traditional channel such as Roll-up, Dolphin and Burpak,

Bursa Pazarı offers private label product services to the all discount in Turkey and to its customers in more than 30 countries on four continents.

The company adopted the notion of timely delivery and sustainable quality to offer superior quality and services with cling films, baking papers, aluminum foils and roasting bags produced in its facilities with the BRC Food Safety Certificate.

You should be sure that your products, offering to the end users under your own brand, are the best in terms of quality and performance. For that purpose, our experienced customer representatives will guide you in the process of selecting products and packages and will explain to you the technical features and sample processes.

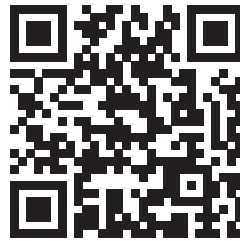

Bursa Pazarı works with the most trusted and approved package suppliers in the selection of packages for the products labeled with customers' private brands. The experienced designing team that provides support in package designing based on customers' demands directly follows all processes from preparation to production to delivery.

Bursa Pazarı works with the most trusted and approved package suppliers in the selection of packages for the products labeled with customers' private brands. The experienced designing team that provides support in package designing based on customers' demands directly follows all processes from preparation to production to delivery.
